

SKYLOC[®]

Real Time Environmental Monitoring System

- Absolute linear distance measure and inspection auto-reporting
- On-board gas detection via certified calibrated multi-gas sensor
- Equipped on the Skycopter confined space inspection drone
- Portable form factor for stand-alone or plug & play use on other drones and mobile equipment
- Potential integration on any other UAV platform

Applications

- Outdoor UAV professional inspection
- Indoor UAV professional inspection
- Robot/Crawler industrial piping inspection
- Tethered sewer manual inspection
- Operator wearable sensor system
- Car/vehicle plug & play installation
